Section 1

EXECUTIVE SUMMARY

The **BLEI-E Bond** (Bledsoe Enlightenment Index — Enhanced Performance Bond Instrument) is a conceptual personal performance bond whose underlying value is indexed to the **BLEI-E Composite Score** — a proprietary six-factor biomechanical performance index authored and owned by Dashawn "Matrix" Bledsoe, Blindside Flanker, New York Rugby Club (NYRC), Division I USA Rugby.

This document presents the BLEI-E Bond as a formal quantitative research framework for presentation to sports analytics companies, quant research firms, and financial institutions with an interest in novel, underrepresented athlete performance data originating from the emerging US rugby market.

The BLEI-E Bond is performance-data driven. Its value is anchored to verifiable, session-logged biomechanical and NIL momentum metrics captured through the **BiomechFlow Capsule** data system — not to market sentiment, franchise valuation, or city budget cycles. This distinguishes it structurally from prior athlete-indexed financial instruments.

Conceptual Inspiration: The Jalen Brunson Bond Index

The BLEI-E Bond draws conceptual inspiration from the **Jalen Brunson Bond Index**, which tied an NBA athlete's market influence and franchise value to a City of New York municipal bond structure. While the Brunson model represents an institutional, city-backed approach to athlete-indexed bonds, the BLEI-E Bond advances the concept into the individual athlete domain — removing dependency on franchise infrastructure and replacing it with a sovereign, athlete-owned performance dataset as the bond's underlying asset.

Core Thesis: Dashawn Bledsoe owns 100% of the BLEI-E Index methodology and data. The bond's underlying asset is not a franchise, a city, or an employer — it is Dashawn's documented, auditable biomechanical performance record.

The instrument is structured across three operational phases: a research instrument stage (current), a private research asset stage (Month 13-24), and a formal private placement under SEC Regulation D Rule 506(b) (Year 2-3). At the current stage, no SEC registration or Reg D filing is required.

The BLEI-E Bond is designed as a scalable, data-sovereign financial research instrument that positions Dashawn Bledsoe at the forefront of athlete-driven quantitative finance — a growing field as athlete NIL rights, biometric data, and performance analytics converge with institutional investment strategies.

Section 2

BOND MECHANICS: HOW THE BLEI-E BOND WORKS

2.1 Underlying Asset

The underlying asset of the BLEI-E Bond is the **BLEI-E Composite Score** — a proprietary six-factor biomechanical performance index scored on a scale of 0 to 100. The score is updated per training session and per match via **BiomechFlow Capsule** data capture, providing a longitudinal, auditable performance dataset that serves as the bond's reference index.

2.2 Structural Parameters

Parameter	Specification
Instrument Name	BLEI-E Performance Bond (Bledsoe Enlightenment Index — Enhanced)
Instrument Type	Conceptual Personal Performance Bond — Research Instrument
Underlying Index	BLEI-E Composite Score (0-100 scale, BiomechFlow Capsule sourced)
Par Value (Face Value)	\$10,000 per unit (conceptual research denomination)
Coupon Equivalent	Licensing fee revenue from BLEI-E data agreements + NIL sponsor activation

Parameter	Specification
	income
Estimated Coupon Range	4-8% annually, scaling with dataset maturity and deal volume
Maturity Structure	Event-triggered (three defined milestone maturity events)
Default Scenario	Perpetual research royalty instrument (ongoing data licensing revenue share)
Data Custodian	Dashawn Ramel Bledsoe (100% data sovereignty)
Issuer	Dashawn "Matrix" Bledsoe (Conceptual Research Stage — no formal issuer entity at present)

2.3 Maturity Triggers

The BLEI-E Bond defines three distinct maturity trigger events. Upon achievement of any one trigger, the bond matures at the corresponding premium to par value:

Trigger	Event Definition	Maturity Premium
Trigger 1	Professional Contract Signing — Dashawn signs a professional rugby contract (Major League Rugby, international club, or equivalent recognized professional league)	110% of Par Value (\$11,000 per unit)
Trigger 2	International Selection — Dashawn is selected to represent USA Rugby at an internationally recognized senior test or tournament level	125% of Par Value (\$12,500 per unit)
Trigger 3	Index Commercialization — BLEI-E Index is cited in at least one published quantitative research paper OR licensed to a fund with AUM above \$100 million	105% of Par Value (\$10,500 per unit)

2.4 Default Scenario

If no maturity trigger is reached within **five (5) years** of the instrument's formal issuance date, the BLEI-E Bond automatically rolls into a **Perpetual Research Royalty Instrument**, entitling holders to a proportional share of ongoing BLEI-E Index data licensing revenue in perpetuity, subject to the terms of the applicable private placement memorandum.

2.5 BLEI-E Bond Valuation Formula

Bond Value = Par Value × (1 + BLEI-E Score Growth Rate) × (1 + NIL Momentum Multiplier)

Where:

BLEI-E Score Growth Rate = (Current Score – Baseline Score) ÷ Baseline Score

NIL Momentum Multiplier = Glow Ring Factor × 0.15

Example (Illustrative): Par = \$10,000 | Score Growth = 12% | Glow Ring Factor = 0.80

Bond Value = \$10,000 × (1.12) × (1 + 0.12) = \$10,000 × 1.12 × 1.12 ≈ \$12,544

Note: The Glow Ring Factor is a proprietary sub-index within the BLEI-E Composite Score framework measuring NIL ecosystem momentum, social capital accumulation, and media presence velocity. The formula above is conceptual and subject to refinement as the dataset matures.

Section 3

COMPARISON TO THE JALEN BRUNSON BOND INDEX

The following side-by-side analysis positions the BLEI-E Bond against the Jalen Brunson Bond Index — the most prominent recent precedent in athlete-indexed fixed income conceptualization — to identify structural distinctions, competitive advantages, and the novel contribution of the BLEI-E framework.

Dimension	Jalen Brunson Bond Index	BLEI-E Bond (Bledsoe)
Issuing Entity	City of New York (municipal bond structure)	Individual athlete (Dashawn Bledsoe, personal instrument)
Underlying Asset	Brunson's market influence, franchise value, NBA ticket sales, and franchise revenue metrics	BLEI-E Composite Score — verifiable, session-logged biomechanical performance and NIL momentum data
Value Driver	Market sentiment, franchise revenue, city economic metrics, ticket sales volume	Auditable BiomechFlow Capsule data, BLEI-E Index score progression, licensing revenue
Institutional Backing Required	Yes — city government authorization, institutional bond underwriters, franchise organizational support	No — research stage requires no institutional backing; athlete owns the underlying asset outright
Scale at Origin	Large-scale: city bond issuance in the hundreds of millions of dollars	Scalable from solo rookie level: begins as a \$10,000-per-unit research instrument, scales with data credibility
Data Sovereignty	Athlete does not own the underlying data — franchise and city control the revenue metrics	Dashawn Bledsoe owns 100% of the underlying index data, methodology, and copyright
Auditability	Dependent on city financial disclosures and franchise reporting — indirect and complex	Direct — BiomechFlow Capsule session logs are athlete-controlled and independently auditable
Market Dependency	Tied to NBA franchise valuation and New York City budget cycles — vulnerable to macro market shifts	Independent of franchise, city, or employer — performance data is portable and athlete-sovereign
Entry Barrier	Extremely high — requires established NBA superstar status, city government engagement, and institutional bond	Low barrier at research stage — any athlete with a documented performance dataset can initiate the framework

Dimension	Jalen Brunson Bond Index	BLEI-E Bond (Bledsoe)
	apparatus	
Regulatory Stage	Formal municipal bond — full regulatory compliance required from inception	Conceptual research instrument at present — Reg D 506(b) pathway available at Year 2+ formalization stage
Maturity Structure	Traditional bond maturity tied to city fiscal calendar	Event-triggered maturity (professional contract, international selection, index commercialization)
Sport / League	NBA — mature, heavily capitalized US professional sports market	Division I USA Rugby — emerging, underrepresented, and underpriced data market with significant upside

Key BLEI-E Bond Structural Advantage: Data sovereignty and institutional independence. The BLEI-E Bond's underlying asset is wholly owned by its author. No franchise, no city, and no employer holds any claim over the index — making it uniquely defensible at the amateur and club level as a research instrument.

3.1 The BLEI-E Originality Thesis

The Brunson Index demonstrates the cultural and financial appetite for athlete-indexed instruments at the institutional level. The BLEI-E Bond advances the concept by three degrees of innovation: (1) it decouples the instrument from franchise and municipal infrastructure; (2) it anchors value to athlete-sovereign, biomechanically verifiable data rather than secondary market sentiment; and (3) it creates a replicable template for Division I and amateur athletes who are structurally excluded from franchise-dependent bond models.

In emerging sports markets — particularly US rugby, which is experiencing significant growth in viewership, investment, and Major League Rugby expansion — early-mover data instruments carry outsized informational value relative to their

current market pricing. The BLEI-E Bond is designed to capture this first-mover premium.

Section 4

REG D 506(B) PRIVATE PLACEMENT PATHWAY

When Dashawn Bledsoe is ready to formalize the BLEI-E Bond as an actual security — projected for Year 2 of the roadmap — the optimal legal pathway is **SEC Regulation D, Rule 506(b)**. This section provides a structured overview of the regulatory framework for reference purposes.

Important: At the current Stage 1 research instrument phase, no SEC registration or Reg D filing is required. The information below is provided for planning and investor education purposes only. Consult a licensed securities attorney before initiating any formal issuance process.

4.1 Rule 506(b) Key Provisions

Provision	Rule 506(b) Specification
Capital Raise Limit	Unlimited — no cap on the amount of capital that can be raised
Accredited Investors	Unlimited number of accredited investors permitted (individual income >\$200K/year or net worth >\$1M excluding primary residence; institutional equivalents)
Non-Accredited Investors	Up to 35 sophisticated non-accredited investors permitted (must have sufficient financial knowledge to evaluate the investment)
General Solicitation	Prohibited — no advertising, public announcements, or general marketing of the offering permitted
SEC Filing Requirement	Form D must be filed with the SEC within 15 calendar days of first sale
Required Documentation	Private Placement Memorandum (PPM) — must be drafted by a qualified securities

Provision	Rule 506(b) Specification
	attorney
Offering Type	Private only — direct, pre-existing relationships with qualifying investors required
State Compliance	Blue sky law compliance required in each state where investors are located
Estimated Legal Cost	\$15,000–\$40,000 in attorney fees for PPM drafting and compliance setup
Annual Compliance Cost	\$5,000–\$10,000 ongoing for reporting and legal maintenance

4.2 Why Rule 506(b) Is the Appropriate Pathway

- **No SEC registration required** — eliminates the substantial cost and time burden of a full public registration statement.
- **Unlimited raise capacity** — allows the instrument to scale from initial research-stage conversations to a multi-investor formal offering without structural reconfiguration.
- **Sophisticated investor access** — the 35-investor non-accredited carveout allows inclusion of strategic partners (sports data firms, analytics companies) who may not meet accredited investor thresholds but possess relevant domain expertise.
- **No advertising prohibition protects the brand** — the no-general-solicitation requirement is consistent with the BLEI-E Bond's private, relationship-driven distribution strategy targeting quant firms and sports analytics institutions.
- **Form D is minimal burden** — a straightforward filing that establishes regulatory standing without triggering full disclosure obligations.

4.3 Pre-Issuance Requirements Checklist

- Copyright registration of BLEI-E Index methodology (copyright.gov — approximately \$65)

- NDA template for data licensing conversations (attorney review recommended: \$500–\$1,500)
- Engagement of qualified securities attorney with sports and private placement experience
- Minimum viable BLEI-E dataset: 20+ documented training sessions and match logs
- Preliminary investor identification — minimum 3 accredited investor relationships established prior to formal offering
- Entity formation (LLC or similar) recommended to hold IP and receive licensing revenue
- PPM drafted and reviewed by securities counsel before any investor conversation referencing a formal offering

Section 5

BOND ISSUANCE READINESS SCORECARD

The following scorecard benchmarks Dashawn Bledsoe's current issuance readiness against the eight criteria required before initiating any formal investor conversation regarding the BLEI-E Bond. Each criterion is assessed against its defined target with a current status and identified action gap.

#	Readiness Criterion	Target Threshold	Current Status (June 2026)	Action Required
1	BLEI-E Dataset — Sessions Logged	20+ documented training and match sessions	0 sessions (framework inception)	Begin BiomechFlow Capsule logging immediately — every session counts
2	Copyright Filed	Active copyright registration of BLEI-E Index	Pending — not yet filed	File at copyright.gov (\$65 filing fee) — this is the

#	Readiness Criterion	Target Threshold	Current Status (June 2026)	Action Required
		methodology		single highest-priority action
3	NDA Template Ready	Executed NDA template for data licensing conversations	Pending — not yet drafted	Draft immediately; engage attorney for review (\$500–\$1,500)
4	First Data License Signed	1+ executed data licensing agreement	0 agreements — outreach phase not yet initiated	Begin outreach to sports analytics platforms and quant research firms
5	BLEI-E Score Benchmark	65+ composite score (out of 100)	Rookie baseline — score to be established upon first 5 logged sessions	Log sessions consistently; establish baseline within first 30 days
6	Social / NIL Presence	5,000+ followers across platforms; active documented training content	Building — social channels in development	Document training publicly; post BLEI-E-indexed content consistently
7	Securities Attorney Engaged	Active engagement with a licensed securities attorney experienced in Reg D	Not yet engaged	Required before any investor conversation referencing a formal bond offer
8	Accredited Investor Network	3+ identified accredited investor relationships (warm contacts)	0 formal contacts identified	Build via LinkedIn outreach and Columbia Sports Management alumni network

Bond Readiness Score: 1 of 8 Criteria Met (Framework document authored — June 2026). Target: 6 of 8 criteria met before initiating any formal bond

conversation with prospective investors.

5.1 Scoring Interpretation

Score Range	Readiness Level	Recommended Action
0-2 / 8	Research Instrument Stage	Internal development only — no external investor conversations
3-5 / 8	Pre-Placement Stage	Informal research presentations to trusted advisors only — no offer language
6-7 / 8	Private Research Asset Stage	Proceed to attorney-supervised letters of intent and private conversations
8 / 8	Formal Placement Ready	File Form D, finalize PPM, formally offer to accredited investors

Current Status: 1/8 — Research Instrument Stage. Estimated timeline to 6/8 readiness: 12-18 months with consistent execution of the Phase 1 roadmap below.

Section 6

THREE-PHASE BOND ROADMAP

The BLEI-E Bond is structured across three sequential phases. Each phase has defined objectives, deliverables, cost parameters, and a go/no-go decision gate before progression to the next phase.

Dimension	Phase 1: Research Instrument (Now — Month 12)	Phase 2: Private Research Asset (Month 13-24)	Phase 3: Formal Private Placement (Year 2-3)
Bond Status	Conceptual research document only — no securities	Pre-issuance private research asset — presented	Formal private security — Reg D 506(b) structure

Dimension	Phase 1: Research Instrument (Now — Month 12)	Phase 2: Private Research Asset (Month 13-24)	Phase 3: Formal Private Placement (Year 2-3)
	filing required	to selected accredited investors	active
Regulatory Status	No SEC filing required	Pre-formal offering — no Form D yet; no offer language used	Form D filed with SEC; PPM finalized and executed
Primary Objectives	Copyright the methodology; sign first data licensing agreement; build BLEI-E dataset (20+ sessions); establish social/NIL presence; draft NDA template	Present to 3-5 accredited investors as private research asset; collect letters of intent; engage securities attorney; begin PPM drafting	Formal bond offered to accredited investor network; coupon payments initiated from licensing revenue; maturity triggers monitored
Key Deliverables	Copyright certificate; executed NDA; first data licensing term sheet; 20+ session log; baseline BLEI-E score established	Investor presentation deck; 3+ signed NDAs with prospective investors; attorney retainer executed; PPM outline drafted	Executed PPM; Form D SEC filing; executed subscription agreements; first coupon payment structure confirmed
Estimated Cost	\$565-\$1,565 total (\$65 copyright + \$500-\$1,500 NDA attorney review)	\$15,000-\$40,000 (securities attorney fees for PPM drafting and Reg D compliance setup)	\$5,000-\$10,000 annually (ongoing compliance, reporting, and legal maintenance)
Go / No-Go Gate	Copyright filed + 1 data license signed + 20 sessions logged = proceed to Phase 2	Securities attorney engaged + PPM outline approved + 3 investor NDAs signed = proceed to Phase 3	Coupon revenue confirmed + Form D filed + PPM executed = active bond status achieved
Investor Activity	None — internal development only	Verbal commitments and letters of intent from 3-5 identified accredited investors	Formal subscriptions from qualified investors; coupon distributions begin
Risk Level	Minimal — no regulatory exposure at research stage	Low-moderate — attorney supervision required to avoid inadvertent offer language	Moderate — full regulatory compliance required; ongoing reporting obligations

6.1 Phase 1 Priority Action Stack (Next 90 Days)

- 1. **File copyright registration** at copyright.gov for the BLEI-E Index methodology and this document — cost: \$65 — timeline: this week.
- 2. **Draft NDA template** for data licensing conversations — engage attorney for review — cost: \$500-\$1,500 — timeline: 30 days.
- 3. **Begin BiomechFlow Capsule logging** — every training session and match — target: 20 sessions within 90 days.
- 4. **Launch documented training content** on social platforms — link content to BLEI-E framework publicly — target: 3 posts per week minimum.
- 5. **Initiate outreach** to Columbia Sports Management alumni network and LinkedIn connections in sports analytics and quant finance.

Section 7

TARGET INVESTOR PROFILE: WHO SHOULD HOLD THE BLEI-E BOND

The BLEI-E Bond is not designed for retail investors. Its data-driven, performance-indexed structure appeals to a specific category of sophisticated institutional and individual investors with domain expertise in sports analytics, athlete data, and alternative asset classes. The following profiles represent the primary target segments.

#	Investor Category	Representative Entities	BLEI-E Value Proposition	Engagement Channel
1	Quantitative Research Firms (Sports Analytics Focus)	Two Sigma Sports Innovation Lab, Zelus Analytics, Stats Perform	Novel, proprietary biomechanical dataset from an underrepresented sport; first-mover data in US rugby analytics market	LinkedIn; Two Sigma Sports Innovation Lab (100 Avenue of the Americas, NYC); conference presentations

#	Investor Category	Representative Entities	BLEI-E Value Proposition	Engagement Channel
2	Sports-Focused Family Offices	NYC-based high-net-worth individuals with sports technology and alternative asset interest	Alternative asset with athlete data provenance; portfolio diversification via sports performance instrument; attractive risk/return profile at research stage pricing	Columbia alumni network introductions; sports technology event networks
3	Columbia University Alumni Network	Columbia Sports Management program alumni in finance, private equity, and sports business	Warm introduction channel via Dashawn's Columbia Sports Management credential; alumni investors motivated to support program alumni in novel ventures	Direct alumni outreach; Columbia Sports Management career network; LinkedIn alumni search
4	Sports Data Platforms (Strategic Investors)	Kitman Labs, Sports Data Labs, Orreco	Strategic value beyond financial return — BLEI-E dataset enriches platform data offerings; potential licensing partnership combined with investment position	Direct BD outreach; sports technology conferences; partnership frameworks
5	Angel Investors in Athlete Fintech	Individual angels active in NIL platforms, athlete data monetization, and sports finance innovation	BLEI-E Bond is at the leading edge of athlete-owned financial instruments — attractive early-stage position in a growing	LinkedIn; AngelList; sports fintech accelerator networks; NYC angel investor communities

#	Investor Category	Representative Entities	BLEI-E Value Proposition	Engagement Channel
			category; NIL ecosystem alignment	

7.1 Investor Communication Principles

- All investor conversations at the Phase 1 and Phase 2 stages must occur under executed NDA — no exceptions.
- No offer language may be used before PPM is finalized and securities attorney has approved the communication.
- Position the BLEI-E Bond as a *research partnership* at the current stage — not as an investment solicitation.
- Lead with data sovereignty narrative — investors respond to the uniqueness of athlete-owned, auditable performance datasets.
- Columbia Sports Management credential is a credibility anchor — lead with it in all warm outreach communications.

Section 8

RISK FACTORS

Any bond instrument — conceptual or formalized — requires transparent disclosure of material risk factors. The following risks are identified for the BLEI-E Bond framework. This section is provided for completeness and investor transparency; it is not exhaustive. A formal Private Placement Memorandum will contain a comprehensive and legally reviewed risk factor section.

Risk Category	Risk Description	Severity	Mitigation
Performance Risk	The BLEI-E Composite Score may not grow as projected if training volume declines,	Moderate	Consistent BiomechFlow Capsule logging; structured training progression; BLEI-E

Risk Category	Risk Description	Severity	Mitigation
	injury occurs, or competitive match opportunities are limited. Score stagnation directly suppresses bond value under the valuation formula.		score floor provisions in bond terms
Liquidity Risk	No secondary market exists for the BLEI-E Bond at any stage of the current roadmap. The bond is illiquid — investors cannot easily sell or transfer their position without bilateral agreement.	High	Full disclosure to investors at outset; right of first refusal provisions on any transfer; perpetual royalty default structure provides ongoing income
Regulatory Risk	SEC rules, Regulation D provisions, and state blue sky laws evolve. Future regulatory changes may alter the legality or economics of the private placement structure contemplated for Phase 3.	Moderate	Ongoing engagement with qualified securities counsel; annual compliance review; structure flexibility built into PPM
Maturity Risk	There is no guarantee that any of the three defined maturity triggers will be achieved within the five-year window. Professional contract signing, international selection, and index commercialization are each subject to external factors outside the issuer's sole control.	High	Perpetual research royalty instrument as default scenario; maturity triggers are diversified across three independent pathways; investor education on event-triggered structure
Data Integrity Risk	The BLEI-E Composite Score's credibility depends	Moderate-High	Establish logging discipline immediately;

Risk Category	Risk Description	Severity	Mitigation
	entirely on accurate, consistent, and uninterrupted BiomechFlow Capsule data capture. Gaps in session logging, data loss, or methodology changes reduce index credibility and investor confidence.		implement data backup protocols; document methodology changes with version control; consider third-party data audit at Phase 2
Market Risk (US Rugby)	The US rugby market is in a growth phase but remains significantly smaller in mainstream investor awareness than the NFL, NBA, MLB, and NHL. Institutional appetite for rugby-indexed instruments is unproven and may be limited.	Moderate	Position as a first-mover advantage rather than a limitation; target quant and analytics investors who value data novelty over market size; MLR expansion and World Rugby growth support long-term market thesis
Concentration Risk	The bond's value is indexed to a single athlete's performance trajectory. There is no portfolio diversification at the underlying asset level.	High	Full disclosure; position bond as a high-conviction, non-correlated alternative asset; structure minimum investment to limit individual investor concentration
IP and Methodology Risk	If the BLEI-E Index methodology is not adequately protected by copyright and trade secret protections, third parties may replicate or challenge the proprietary nature of the underlying asset.	Moderate	File copyright immediately; document methodology with timestamps; execute NDAs before any methodology disclosure; consult IP attorney on trade secret protections

The risk factors listed above do not constitute a complete disclosure. A formal Private Placement Memorandum prepared by qualified securities counsel will contain a comprehensive and legally reviewed risk factor section tailored to the specific terms of any formal offering.

Section 9

ATTORNEY AND ADVISOR CONTACTS

The following legal and advisory resources are identified for the BLEI-E Bond development process. Engagement of qualified legal counsel is mandatory before any formal investor conversation referencing a securities offering.

9.1 Sports IP and Securities Attorneys — New York City

Firm	Practice Focus	Relevance to BLEI-E Bond
Romano Law NYC	Sports data, IP, entertainment law, athlete representation	Primary recommendation for BLEI-E Index copyright strategy, data licensing agreements, and NDA drafting; NYC-based with sports data expertise
Heitner Legal	Athlete contracts, NIL agreements, sports business transactions	Relevant for NIL agreement structuring, data licensing terms, and athlete IP protection at the Phase 1 stage
Ropes & Gray — Sports and Entertainment Practice	Securities law, sports transactions, entertainment finance	Full-service securities and sports law capability — appropriate for Phase 3 PPM drafting and Reg D 506(b) compliance architecture
Gusrae Kaplan Nusbaum PLLC	SEC compliance, Regulation D private placements, securities litigation defense	Specialized Reg D expertise — appropriate lead counsel for Form D filing, PPM finalization, and ongoing compliance in Phase 3

9.2 Financial Advisors with Sports Analytics Expertise

Organization	Location	Engagement Strategy
Two Sigma Sports Innovation Lab	100 Avenue of the Americas, New York, NY	Primary target for Phase 1 research partnership outreach; position BLEI-E dataset as novel sports analytics research asset; request informational meeting via LinkedIn or Columbia alumni connection
Columbia University Sports Management Alumni Network	Columbia University, Morningside Heights, New York, NY	Warm introduction channel leveraging Dashawn's Columbia Sports Management credential; identify alumni in sports finance, private equity, and quantitative research via Columbia alumni directory and LinkedIn; request introductory meetings with BLEI-E research document as collateral
Zelus Analytics	Remote / Distributed (multiple US offices)	Sports analytics firm with demonstrated interest in rugby and international sports data; target for data licensing partnership and potential Phase 2 research asset conversation
Stats Perform	Chicago, IL (with NYC operations)	Global sports data company — potential licensing partner for BLEI-E dataset; strategic investor profile rather than pure financial investor

9.3 Recommended Engagement Sequence

6. File copyright registration (this week — no attorney required).
7. Engage Romano Law NYC or Heitner Legal for NDA drafting — Phase 1 priority.
8. Initiate Columbia alumni outreach with BLEI-E research document as the conversation asset.

9. Schedule informational meeting with Two Sigma Sports Innovation Lab once 20+ session dataset is logged.
10. Engage Gusrae Kaplan Nusbaum or Ropes & Gray at Phase 2 onset for PPM and Reg D preparation.
